

The world is facing an unprecedented ecological and social crisis.

As war drums beat, the greed and power of the 1% is the most pressing danger to us all.

A small number of billionaires now own more wealth than the majority of the world's population combined.

Their ruthless greed to keep accumulating more profits has driven us to the point where a climate emergency threatens to end the liveability of our planet.

COVID-19 has taught us that to survive we have to build community solidarity ahead of corporate profit.

If there is going to be a peaceful, climate-safe, and a job-secure future for all, there must be radical political change.
